LIST OF TABLES

PART II
Table 1. Employment by industry (South Africa, First Quarter 2008)
Table 2. Age distribution by labour force status (South Africa, First Quarter 2008)
Table 3. Summary statistics of age distribution by labour force status (South Africa, First Quarter 2008)
Table 4. Employment by industry
Table 5. Employed population by occupation and SE
Table 6. Conditional distributions of SE given occupation (US, 2006)
Table 7. Conditional distributions of occupation given SE (US, 2006)
Table 8. Summary statistics for conditional distributions of income by industrial sector
Table 9. Conditional distributions of occupation given SE and sex
Table 10. Conditional distributions of occupation given SE and year
Table 11. Summary statistics for conditional distributions of income by industry and sex
Table 12. Calculation of the core employment-population ratio
Table 13. Age at employment and at retirement
Table 14. Calculation of the unemployment rate
Table 15. Ratio of youth to national unemployment rate
Table 16. School-to-work transition matrix
Table 17. Short and long hours of work
Table 18. Alternative rates of labour slack in seven countries
Table 19. Occupational segregation among young men and women in three countries
Table 20. Education and occupation mismatch in terms of ISCO and ISCED
Table 21. Informal employment in three countries
Table 22. Average reported monthly earnings (USD 2007) in main job among men and women
Table 23. Estimated parameters of the earnings function
Table 24. Low earnings in seven countries

PART III
Table 1. Reconciliation of employment data: Labour force survey and National Accounts
Table 2. Reconciliation table: Number of employed persons in manufacturing establishments with 50 or more workers
Table 3. Reconciliation table: Unemployed persons seeking work at public or related employment offices
Table 4. Sampling errors of main labour force indicators: A numerical example
Table 5. Relative standard error by size of estimate
